

Water shut off / on July 22, 2023 Dennis Angle

The main water valve is next to the upper parking lot in a vault just North of the tree at the entrance off the parkway. There is a 15cm X 15cm inspection door on the vault lid.

Tools required;

Flashlight

String or rope for the light

Long boat hook like the one on the work boat

Open the inspection door

Turn on the flashlight and lower it down about 1 meter

Look in and identify the red handle on the ball valve

Open – handle is down

Closed – handle is perpendicular to the pipe

Move the handle with the boat hook.
